New Mexico: 2 IEDs Discovered Inside Residence

On 7 January 2023, Alamogordo Police Department officers discovered two IEDs, drugs, and 20 firearms at an Alamogordo residence after searching the home during the arrest of a suspect on unrelated charges. The Patrol Explosive Detection Dog Team from Holloman Air Force Base, Dona Ana County Bomb Unit, and the ATF responded to assist and removed the IEDs from the scene. No further device details were provided. The 60-year-old male suspect was arrested and charged with trafficking a controlled substance, possession of a firearm or destructive device by a felon, and possession of drug paraphernalia.

Pennsylvania: 2 IEDs Discovered in Hospital Patient's Bag

On 8 January 2023, at approximately 2000 hours local time, Oil City Police Department officers responded to a local hospital after hospital staff discovered two IEDs, described as two cylindrical devices with a fuse coming from the end of each device, in a patient's bag. The City of Erie Bomb Squad responded to assist, X-rayed the devices, further described as one white device and one black device, showing "what appears to be many round objects inside the tube surrounded by some type of powder," and safely removed the IEDs for further analysis. The 29-year-old Tionesta patient was arrested and faces multiple charges including the unlawful possession or manufacture of weapons of mass destruction. The incident remains under investigation.

Utah: IID Thrown at Capitol Building, 1 Arrested

On 11 January 2023, at approximately 2136 hours local time, Utah Highway Patrol troopers and Salt Lake City Fire Department crews responded to the Utah State Capitol building after a 33-year-old male suspect lit an improvised incendiary device (IID), described as a Molotov cocktail, on the staircase of the south side of the building and threw it at the doors. No further device details have been released. The IID started a small fire that burned itself out and caused minor damage to the door and the steps, but no injuries were reported. The suspect admitted to throwing the IID at the Utah State Capitol building and at a church office building nearby. He was arrested and faces charges of aggravated arson and use of explosive/chemical or incendiary device.

For more information about efforts to prevent bombing incidents using precursor chemicals and IED components, please visit the **Bomb-Making Materials Awareness Program (BMAP)** website at <https://www.cisa.gov/bmap>.

EXEDNZI

¹ **The Infrastructure Categories** listed in this report are derived from the DHS Critical Infrastructure Sectors:

Chemical	Financial Services	Healthcare and Public Health
Commercial/Retail	Government Facilities	Information Technology
Communications	• Courthouse	Nuclear
Critical Manufacturing	• Federal	Transportation Systems
Dams	• State	Water
Defense	• Local	Non-Critical Infrastructure
Industrial Base	• National Monuments	• Other (e.g., faith-based facilities)
Emergency Services	• Parks	• Postal and Shipping
Energy	• Schools	• Private Residence
Food and Agriculture		

DISCLAIMER:

This product provides a statistical analysis of available open-source reporting of explosives-related events, bomb threats, and improvised explosive device (IED) activity in the United States and its territories. Due to the nature of open-source intelligence (OSINT) collection, this data may not reflect all bomb-related incidents or casualty figures during the stated period and does not include classified or law enforcement sensitive information. Incidents that received a response from authorities, law enforcement, and/or first responders are frequently reported only through official channels, such as locally held police logs. Therefore, the information may not be available and/or captured in the data used to compile this report.

² **The Incident Types** used in this report are defined as follows:

- Bomb-Making Material (BMM): Materials commonly associated with IEDs but which were not assembled into a functional device at the time of discovery; this category includes both discoveries and thefts
- Bomb Threat: An intentionally false claim of the presence of a bomb at a certain location
- Device Discovered: The discovery of a hazardous device before the device was emplaced at the targeted location
- Device Emplaced: The discovery of a hazardous device emplaced at a targeted location
- Device Functioned: A hazardous device functioned
- Suspicious Package Discovered: The discovery/examination of an ultimately non-hazardous package

³ **The Federal Regions** used in this report consist of:

- Region 1 Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont
- Region 2 New Jersey, New York, Puerto Rico, U.S. Virgin Islands
- Region 3 Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia
- Region 4 Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee
- Region 5 Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin
- Region 6 Arkansas, Louisiana, New Mexico, Oklahoma, Texas
- Region 7 Iowa, Kansas, Missouri, Nebraska
- Region 8 Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming
- Region 9 Arizona, California, Hawaii, Nevada, American Samoa, Guam, Trust Territory of the Pacific Islands
- Region 10 Alaska, Idaho, Oregon, Washington

NOTE: Incident map and circle graph indicate Federal regions utilizing the same colors. Graph reads clockwise from top.
